RIVETING

PROPOSED AREAS OF COOPERATION

→ **We offer specialized services in riveting and caulking of ship skin and bridge plating as well as welding and erection services. The rivets we use include spherical head rivets, conical head rivets, mushroom head rivets and conical head semi-tubular rivets.**

→ **We perform ship repair works in foreign shipyards where our highly qualified staff constructs and erects ship hull sections.**

→ **We offer:**

- “Hot” riveting of sheet metal plates, steel structures, bridges and supporting piers
 - Replacement of skin plating in ships, yachts, tanks, etc.
 - Reaming of skin plating for openings
 - Caulking by close-up
 - Services in corrosion protection
 - Sand blasting and spray painting
-

→ **Projects we have been involved in:**

- Repair works in an old luxury yacht Nahlin in the Nobisburg GmbH shipyard in Rendsburg, Germany.
 - Cleaning and painting works on cast iron columns, cleaning and impregnation of wooden elements in the Main Railway Station in Szczecin.
 - Repair works including riveting of stringers to cross beams on the railway bridge in Międzyrzecz.
-

→ **Examples of completed projects:**

- Riveting of steel structure of the bridge in Wólka Orłowska
 - Riveting of main structure of the railway bridge in Belgium
 - Riveting of the steel viaduct at the railway line from the Main Railway Station in Szczecin to Trzebież in Police
 - Curved cutting of steel and riveting of steel railway viaduct elements in France, Parisian Region
